

CFK 4200 Emergency Communications Kit

Overview

Integral Systems SATCOM Solutions division's CFK 4200 Emergency Communications Kit gives first responders the capability to connect to remote resources while in the field under adverse circumstances. To maximize flexibility, the system provides users with the ability to establish reliable communications via three methods: BGAN satellite, satellite phone, or a cellular data network (EV-DO and UMTS).

The Emergency Communications Kit also acts as a mobile office with an integrated scanner, printer, webcam, and rugged laptop. With the key components already connected, setup of the system is fast and easy.

The 4200V is an enhanced multimedia version of the kit. It adds a video camera, video editing software, support accessories, and an additional transit case.

Included Accessories

- 7 Port USB Hub
- 2.0 Megapixel Webcam
- USB Mouse
- USB-Powered Light
- VoIP Software
- Handheld GPS

Sat Phone Options

- Globalstar GSP-1600 or Iridium 9555

Detailed Specifications
