

3.1 m Prime Focus Antenna System

Model Number PRT-310

Features

- Specifically Designed for FCC Spec. 29-25 Log θ for 2° Spacing
- Multi-Feed Systems Available (up to 2)
- Available with Az/EI Fixed, Polar, and Dual Axis Navigator mounts
- 125 Mph Wind Survival
- C/Ku High Efficiency Ideal for Digital Compression
- High Accuracy Antenna, Low Transportation Cost

Description

The Patriot 3.1 meter antenna is manufactured in the United States and is the symbol of quality in the antenna industry. It features a variety of mounting options and a dual sided galvanized reflector which is powder coated for superior protection against the elements. Stainless steel hardware is also available.

The 3.1 meter prime focus reflector consists of 8 draw die formed petals. The contoured petals with matched radial beams and hub assembly ensure easy installation without field alignment. This antenna is competitively priced for the broadcast and cable industry as well as the educational market. Complete turnkey systems are available.
